“For more than 100 years, PARI has stood for high quality, Made in Germany inhalation devices. We are expanding our portfolio with the PARI BOY® Go, a mobile inhalation device designed for users who want the flexibility to integrate their inhalation therapy into their daily routines. We are also responding to the needs of many patients for compact and portable options that can be used outside the home,” explains Dr Frank Bredl, Managing Director of PARI GmbH.

With its new device, PARI is extending its established PARI BOY® family of products, now available in the eighth generation. The family of devices has been tested for many years in countless studies and has received multiple awards.

Featuring membrane nebulisation technology, inhalation therapy with the PARI BOY® Go is fast and almost soundless. Its compact format and battery powered operation make the device a flexible choice. It is suitable for inhaling saline solutions and approved medications. A special feature of the PARI BOY® Go is the integrated PARI Care Mode. A reminder function helps ensure consistently reliable nebuliser performance by reminding users to carry out the required maintenance steps on a regular basis.

Developed and manufactured in Germany, the PARI BOY® Go embodies the company's ambition to combine innovative inhalation technology with user-friendly design and proven quality.

About PARI

As a manufacturer of medical devices with a focus on inhalation devices, PARI has been the trusted brand for doctors, pharmacists and patients for decades and is a market leader in inhalation devices, saline solutions and holding chambers in Germany. PARI is the global market leader in the segment of inhalation devices for cystic fibrosis.

Under the umbrella of PARI Medical Holding GmbH, the PARI corporate group is based in Starnberg and organised into several subsidiaries: PARI GmbH (Starnberg), PARI Pharma GmbH (Gräfelfing / Gilching), PARItec GmbH (Weilheim) and PARI Respiratory Equipment Inc. (USA). There are also international branches in France, Great Britain, Spain, Switzerland and China and a worldwide distribution network.

With a workforce of around 700, the company can look back on a history of more than 100 years in business. It is where tradition and innovation meet to deliver well thought-out and effective product lines with an excellent reputation. PARI is developed and manufactured in Upper Bavaria – Made in Germany. PARI products have been used millions of times worldwide, are clinically tested, and are subject to strict quality controls.

The most well-known products include the PARI BOY® and the eFlow®*rapid* with vibrating membrane technology. With these and other product lines, PARI has had a lasting influence on respiratory therapy and is globally renowned for its quality, innovation, and reliability.
