VORTEX[®]
Non Electrostatic Holding Chamber

The next generation of PARI VORTEX[®], now even more user friendly, helps minimize the technique and coordination needed for effective inhaler treatments. Patients of all ages are assured a more efficient and consistent medication dose from their MDI for optimal treatments.

Chloe Ladybug Mask	044F5110	A7015
Felix Frog Mask	044F5210	A7015
Adult Mask	044F7247	A7015

THE DIFFERENCE IS IN THE DELIVERY¹

Vortex significantly reduces oropharyngeal deposition, which may cause unwanted side effects, vs. MDI alone.

Vortex delivers a higher respirable drug dose than MDI alone and OptiChamber Diamond.

VORTEX Grows With Your Patients

From toddler to adult, Vortex offers a series of facemasks for various age groups, eliminating the need to purchase a new holding chamber when changes in mask size are needed.

¹Measurements according to Ph. Eur. 2.9.18 and USP 601: Next Generation Impactor; const. flow 30l/min; 50 ± 5 % relative humidity and 23 ± 2 °C; 3 test devices each measured in triplicates (n=3x3=9); pMDI Sultano[®] (100µg Salbutamol, GlaxoSmithKline); *All registered marks and trademarks belong to their respective companies
¹US Patent Number: 7,562,656
