New Functions

Display delivers feedback

The eFlow® rapid with eBase controller can do much more. Its display delivers feedback during inhalation.

Good to know:

The eBase controller can be used with the eFlow® rapid nebuliser handset for general use as well as with drug-specific nebuliser handsets (e.g., Altera® for Cayston®).

A Few Examples:

- Battery charge level 50%
  - Have new batteries on hand or operate with the power adapter connected

- Cable connection to the control unit or on the nebuliser handset interrupted
  - Check cable connections

- No medication added
  - Add medication

The eFlow® rapid nebuliser handset and the eFlow® rapid aerosol head are compatible with both the dark blue Control Unit (eBase Controller) and the turquoise Control Unit (previous version).
The eFlow® rapid nebuliser handset and the eFlow® rapid aerosol head are compatible with both the dark blue Control Unit (eBase Controller) and the turquoise Control Unit (previous version).
**Hygiene Tips**

**for home**

Please refer to the Instructions for Use for more details

**Clean**

Dismantle the nebuliser into its components. Rinse thoroughly in warm tap water with a little washing-up liquid immediately after every inhalation.

**Disinfect**

Disinfect the dismantled nebuliser and aerosol head at least once a day by putting them in a commercially-available baby bottle disinfector for 6 minutes or alternatively by boiling them in distilled water for at least 5 minutes.

**Dry**

Allow to dry completely.

**Store**

Store in a clean, dry and hygienic place.

**Functionality Test**

**for Aerosol Heads**

Measure the time it takes for 2.5 ml of an isotonic saline solution (NaCl 0.9%) to be nebulised.

1. Should the measured time for nebulisation lie between 4 and 5 minutes, the aerosol head should be **cleaned** using the easycare cleaning aid.

2. Should the measured time for nebulisation be longer than 5 minutes after cleaning with easycare, then the aerosol head should be **changed**.

**Components**

- eFlow Controller
- On/off switch
- Connection cord
- Aerosol head
- Aerosol chamber*
- Inspiratory valve
- Mouth piece with expiratory valve
- Mediation reservoir*
- Pre-fitted nebuliser parts*
- Mediation cap
- Cap seal

* Aerosol chamber and medication reservoir are pre-fitted and cannot be taken apart.

**Modern Inhalation Therapy, it’s Twice as Fast**

eFlow®rapid enables quick and efficient inhalation significantly reducing the treatment burden.²

**The Main Advantages at a Glance:**

- Short treatment times mean better quality of life
- Quiet running for discrete use
- Light, compact and portable. Can be run on either batteries or mains power for greater mobility
- Easy to clean, handset can be disinfected and autoclaved for the highest standards of hygiene
- Display delivers feedback during inhalation
